

ORLIN NIKOLOV

Junior Java Backend Developer

Plovdiv, Bulgaria • orlin.nikolov@hotmail.com

github.com/OrlinGit • linkedin.com/in/orlin-nikolov-3b646956 • [Certificates & portfolio](#)

SUMMARY

Career-changing engineer moving into Java backend development, with structured training in Java, Spring Framework, REST APIs and SQL. Over 15 years of engineering experience in the medical device and manufacturing industries — quality assurance, technical documentation and cross-functional project coordination in strictly regulated environments. MSc in Mechatronics. Looking for a junior Java backend role where engineering discipline, analytical thinking and a fast learning curve add value from day one.

TECHNICAL SKILLS

Languages: Java (17 / 21), SQL, Python (fundamentals)

Backend: Spring Boot, Spring MVC, Spring Data JPA, REST API design, DTO layer, bean validation, layered architecture, OOP

Databases: PostgreSQL (pgAdmin), Microsoft SQL Server

Tools: Git, GitHub, Maven, IntelliJ IDEA, Postman, Thymeleaf, Lombok, Jackson

Other: QA fundamentals, system analysis, technical documentation

Spoken languages: English (fluent, C1), Bulgarian (native)

PROJECTS

Football Players Statistics API

github.com/OrlinGit/com.footballstat

Java 17 • Spring Boot 4 • Spring Data JPA • PostgreSQL • Maven • Jackson

- REST API over four related entities (Teams, Players, Matches, Records) exposing full CRUD across four controllers, built on a layered architecture with service interfaces, a DTO layer and bean validation.
- Designed a CSV import pipeline that loads raw match data into PostgreSQL, including a custom Jackson date deserializer and a database initialiser.
- Implemented the core analytical feature: a `/api/players/mvp` endpoint that computes which pair of players has spent the most total minutes on the pitch together across all matches.

Santa's Workshop — Gift & Delivery Management API

github.com/OrlinGit/Santa-s-Workshop

Java 21 • Spring Boot 4 • Spring Data JPA • PostgreSQL • Maven

- Backend service managing gifts, elves and deliveries, with enum-driven state (gift status, delivery status, elf skill level) and PATCH endpoints for state transitions such as wrapping a gift or assigning it to an elf.
- Structured around interface-backed services and Spring Data repositories; developed over daily commits with a clean, incremental history.

Quiz Application

github.com/OrlinGit/quizapp

Java 21 • Spring Boot • Spring MVC • Thymeleaf • Lombok

- Server-rendered web application following the MVC pattern: questions are loaded from JSON, presented one at a time with Next/Previous navigation, and scored on a results page listing every incorrect answer alongside the correct one.

Also on GitHub: console-based Hotel Reservation and Car Rental systems built on core OOP principles (abstract classes, interfaces, CSV persistence, input validation), and ~170 solved exercises from the Sirma Academy Java course.

TRAINING & CERTIFICATIONS

Java Back End Development — Sirma Academy

Feb 2025 – Mar 2026

Java, Spring Framework, REST APIs, backend architecture, relational databases

Git Foundations & English for IT — Sirma Academy

Nov 2025 – Jan 2026

QA Fundamentals & Programming Fundamentals — SoftUni

Jul 2024 – Mar 2025

Programming Fundamentals and OOP with Python — SoftUni

Jan 2024 – Jun 2024

EDUCATION

Technical University of Sofia — Plovdiv branch

Sep 2025 – Jun 2026

MSc in Mechatronics

Mechanical engineering, electronics and software development, with an emphasis on structured problem solving.

PROFESSIONAL EXPERIENCE

Pentax Medical Bulgaria — Plovdiv, Bulgaria

Jul 2025 – Present

Supplier Quality Specialist

- Perform quality assurance of incoming components and materials used in the production of endoscopic medical devices.
- Ensure compliance with internal quality standards and medical device regulations; work daily in a documentation-driven, audited environment.
- Analyse non-conformities and coordinate corrective actions with suppliers and internal engineering teams.

Gotmar Ltd. — Plovdiv, Bulgaria

Sep 2017 – Jun 2025

Customer Support Specialist / New Projects Coordinator / Tooling Equipment Engineer

- Coordinated the transfer and launch of new production projects, from specification through to stable serial production.
- Optimised manufacturing processes and equipment, improving operational efficiency and reducing downtime.
- Acted as the technical interface between customers, engineering and operations — requirements gathering, root-cause analysis and documentation.

Biotronik Bulgaria — Sofia, Bulgaria

Oct 2009 – May 2017

Medical Equipment Technician → Sales Representative → Junior Product Manager

- Progressed through three roles over nearly eight years, ending as Junior Product Manager for cardiac pacemakers.
- Supported the full product lifecycle: technical documentation, regulatory coordination, market analysis and cross-functional alignment.
- Provided technical support and training to clinical staff on implantable device systems.
